🎓 EDUCATION

ENIT, *B.Eng in Software Engineering*
2024 – 2027 | Tunis, Tunisia

IPEIM, *Pre-Eng: Physics & Tech*
2021 – 2023 | Monastir, Tunisia

- High Honors (Rang 78)

🧠 SKILLS

Cybersecurity

Cloud Computing (AWS)

AI (RAG, Computer Vision)

🛠️ TECHNICAL STACK

Cybersecurity & Cloud

- Penetration Testing Basics
- Metasploit / Scripting / Burpe
- Ansible / Terraform (IaC)

📜 CERTIFICATIONS

Certified Associate Penetration
Tester (CAPT) - Hackviser

CCNAv7 Introduction to Networks
(Cisco)

🤝 SOFT SKILLS

- Teamwork
- Time management
- Communication

🏆 AWARDS

CyberCriminalite & Gouvernance,
ESPRIT

Cyber Camp 6.0, *INSAT*

Cyber Horizon, *FST*

GOAT-1.0, *Supcom*

👤 PROFESSIONAL PROFILE

Software Engineering student at ENIT with strong interests in Cybersecurity, Embedded Systems, Cloud Security, and AI integration. Motivated to design and develop secure, intelligent, and reliable systems by combining software engineering, ethical hacking, embedded technologies, and AI-driven solutions to identify vulnerabilities, enhance system resilience, and improve infrastructure security.

💼 PROFESSIONAL EXPERIENCE

Network & Security Infrastructure Intern, *TAV Airports*

07/2025 – 08/2025 | Enfidha, Sousse

- Assessed the parking camera and network infrastructure to identify security, reliability, and integration weaknesses.
- Analyzed the connection between the parking server and the airport central server to evaluate potential risks and vulnerabilities.
- Technologies: ENSP, Network Security, YOLO, Computer Vision.

📁 KEY PROJECTS

Vision-to-Infrastructure Pipeline (PFA 2), *ENIT*

2025 – 2025

Built a graphical interface that accepts either an architecture image or an input prompt, uses fine-tuned YOLOv8 and RAG to translate real network infrastructure into cloud equivalents, then generates a deployable Terraform "main.tf" and Ansible configuration. Tech Stack: Python, YOLOv8, RAG, Terraform, Ansible, Node.js.

Network Automation & Monitoring (RAG), *GitHub*

2025 – 2025

Designed an architecture translation system that maps real network infrastructure components to their equivalent cloud architecture resources using RAG.

Les techniques d'analyse de données dans les Data Lakes (PFA1)

2025 – 2025

- Conducted a bibliographic study on Data Lake architectures, Big Data tools, cloud storage, and security challenges such as access control, encryption, and data leaks.

🏠 ORGANISATIONS

Securinets ENIT

Active member in the cybersecurity club, participating in security-related activities, workshops, and events.

FabLab ENIT

Helped organize **Aero-Fab**, a robotics competition including junior line-follower robots and all-terrain robots.
