

Wael HAMMALI

SOFTWARE ENGINEERING STUDENT @ ENIT

✉ wael.hammali@etudiant-enit.utm.tn

☎ +216 94916106

📍 Tunis, Tunisia

🌐 github.com/WaelHammali

📁 PROFESSIONAL PROFILE

Software Engineering student at ENIT passionate about Cybersecurity and Penetration Testing, with a strong interest in Cloud Security. Motivated to build secure systems and develop tools and applications that help detect vulnerabilities, simulate attacks, and improve infrastructure security through ethical hacking and secure development practices.

🧠 EXPERTISE

Cybersecurity

Cloud Computing (AWS)

AI (RAG , Computer Vision)

🎓 EDUCATION

ENIT, *B.Eng in Software Engineering*
2024 – 2027 | Tunis, Tunisia

IPEIM, *Pre-Eng: Physics & Tech*
2021 – 2023 | Monastir, Tunisie

- High Honors (Rang 78)

🛠 TECHNICAL STACK

Cybersecurity & Cloud

- Penetration Testing Basics
- Metasploit / Scripting / Burp
- Ansible / Terraform (IaC)

🏆 AWARDS

CyberCriminalite & Gouvernance (ESPRIT)

Cyber Camp 6.0 (INSAT)

Cyber Horizon (FST)

GOAT-1.0 (Supcom)

Out Of Brief (Junior Enterprise / ENIT)

📁 PROFESSIONAL EXPERIENCE

Network & Security Infrastructure Intern — TAV Airports, TAV Airports

07/2025 – 08/2025 | Enfidha, Sousse

- Assessed the parking camera and network infrastructure to identify security, reliability, and integration weaknesses.
- Analyzed the connection between the parking server and the airport central server to evaluate potential risks and vulnerabilities.
- Proposed a YOLO-based vehicle detection solution to improve parking monitoring and reduce fraud.
- **Technologies:** ENSP, Network Security , YOLO, Computer Vision, AI, Parking Systems.

📁 CERTIFICATIONS

Certified Associate Penetration Tester (CAPT) — Hackviser

CCNA Introduction (Cisco)

📁 KEY PROJECTS

Vision-to-Infrastructure Pipeline (PFA 2) [🔗](#) , ENIT

2025 – 2025

Built a graphical interface that accepts either an architecture image or an input prompt, uses fine-tuned YOLOv8 and RAG to translate real network infrastructure into cloud equivalents, then generates a deployable Terraform "main.tf" and Ansible configuration.

Tech Stack: Python, YOLOv8, RAG, Terraform, Ansible, Node.js.

Les techniques d'analyse de données dans les Data Lakes (PFA1) [🔗](#)

2025 – 2025

- Conducted a bibliographic study on Data Lake architectures, Big Data tools, cloud storage, and security challenges such as access control, encryption, and data leaks.

Network Automation & Monitoring (RAG), GitHub

2025 – 2025

Designed an architecture translation system that maps real network infrastructure components to their equivalent cloud architecture resources using RAG.

Full-Stack Recruitment Management Platform, GitHub

2025 – 2025

- Developed a recruitment management platform with candidate login, CV upload, HR dashboard, job offers, and candidate-job matching score.
- Node.js · Express.js · MySQL · JavaScript · Tailwind CSS.

RendezvousJEE — Clinic Management, GitHub

2025 – 2025

- Developed and deployed a Java web application using Jakarta EE, JPA, WildFly.
